- Bachelor of Engineering,
Information Technology, 2020
- Maharashtra Institute of Technology, Pune
 - CGPA: 6.03

Profile Summary

- A dedicated and **detail-oriented** Frontend Developer with **2 years of experience** specializing in creating **reusable components**, **responsive web designs**, and maintaining high standards of **accessibility and SEO**.
- Proficient in **Nuxt.js**, **Javascript**, **Vuex**, **Tailwind** , **React** and experienced in **Agile environments**.
- Contributed to multiple high-impact projects including **CMS development**, **Frontend Library creation**, **Global Header/Footer CMS**, and **Design Systems**.
- Demonstrated success in **improving website performance**, reducing FCP/LCP by 40%, and achieving an 80% **reduction in discrepancies** through implementing process enhancements.
- Strong collaborator** with **cross-functional** teams, adept at problem-solving and **delivering high-quality solutions**.

Experience

Dassault Systemes, Pune

Software Engineering Specialist

May 2022 - Present

Projects

- Dynamic CMS for all Company Websites**
 - Developed and maintained responsive CMS components and content types, using Nuxt 3 and TypeScript with Drupal REST API.
 - Integrated analytics, SEO enhancements, and multilingual support to increase site engagement.
 - Implemented Modular code splitting, lazy loading, etc enhancing overall application performance.
 - Led performance optimizations, reducing FCP and LCP by 40%, resulting in faster load times.
- Comprehensive Frontend Component Library**
 - Created a in house library of reusable components using Vue Composition API, and Tailwind CSS.
 - Ensured cross-device compatibility, leading to a consistent user experience.
- Global Header/Footer CMS**
 - Developed a scalable, embeddable navigation system, used across all the company websites, with a 2-person team.
 - Implemented translations and accessibility improvements, enhancing usability.
 - Conducted A/B testing for user interaction refinement, improving user retention.
- Design System and Component Library**
 - Contributed to the creation of a comprehensive design system, reducing development time by 30%.
 - Conducted workshops on design system implementation and best practices, fostering team collaboration.
 - Served as a guldeline for development across multiple teams and applications within the organization.
- Card Generation Application for Multi-Site Integration**
 - Developed an application to generate and display cards across different company websites, streamlining content management.
 - Collaborated with UX, QA, and infrastructure teams to ensure seamless integration and functionality.
- Additional Achievements**
 - Successfully resolved critical runtime issues, ensuring smooth project deliveries across multiple projects.
 - Proposed and implemented process enhancements, improving sprint delivery rates to 95%.
 - Presented on accessibility standards, leading to achieving AAA certification, and increased adoption of best practices across the company.
